RLA50 (hollow shaft)

SSI / CANopen

Thanks to its installation depth of only 20 mm, the bearingless magnetic rotary encoder RLA50, comprising a magnetic ring and sensor head, is ideally suited for plants and machinery where space is very tight. The non-contact measuring principle allows for error-free use even under harsh environmental conditions, as well as ensuring a long service life.

This bearingless encoder can be mounted on shafts with a diameter of 30 mm.

SSI CANopen

High rotational speed

Protection level
IP40

Shock / vibration resistant

Reverse polarity protection

Temperature range
-10°C...+70°C

Powerful

- High shock and vibration resistance.
- Non-contact measuring system, free from wear, ensures a long service life.
- High resolution, 16,000 measuring steps/revolution.
- Direct measurement on shaft or axis.

Fast start-up

- Distance monitoring by LED.
- Large mounting tolerance between magnetic band and sensor head.
- Requires very little installation space.
- Connection by M12 connector.
