

## **Temposonics**®

Magnetostrictive Linear Position Sensors

# **EP / EL CANopen**Data Sheet

- For standard applications
- Position measurement with more than one magnet

#### **MEASURING TECHNOLOGY**

The absolute, linear position sensors provided by MTS Sensors rely on the company's proprietary Temposonics® magnetostrictive technology, which can determine position with a high level of precision and robustness. Each Temposonics® position sensor consists of a ferromagnetic waveguide, a position magnet, a strain pulse converter and supporting electronics. The magnet, connected to the object in motion in the application, generates a magnetic field at its location on the waveguide. A short current pulse is applied to the waveguide. This creates a momentary radial magnetic field and torsional strain on the waveguide. The momentary interaction of the magnetic fields releases a torsional strain pulse that propagates the length of the waveguide. When the ultrasonic wave reaches the end of the waveguide it is converted into an electrical signal. Since the speed of the ultrasonic wave in the waveguide is precisely known, the time required to receive the return signal can be converted into a linear position measurement with both high accuracy and repeatability.

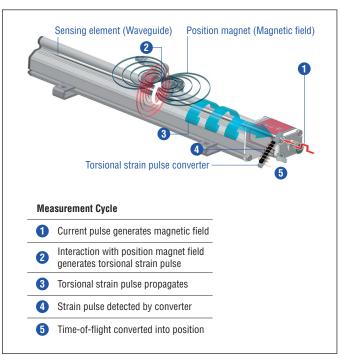

Fig. 1: Time-of-flight based magnetostrictive position sensing principle

#### **EP / EL SENSOR**

Robust, non-contact and wear free, the Temposonics® linear position sensors provide the best durability and precise position measurement feedback in harsh industrial environments. Measurement accuracy is tightly controlled by the quality of the waveguide manufactured exclusively by MTS Sensors.

The compact Temposonics® EP as well as the ultra low Temposonics® EL are profile sensors suitable for standard applications and in particularly for applications with limited installation space. The evaluation electronics is accommodated in an aluminum sensor housing. Typical fields of applications are plastics industry, metal forming and woodworking as well as factory automation.

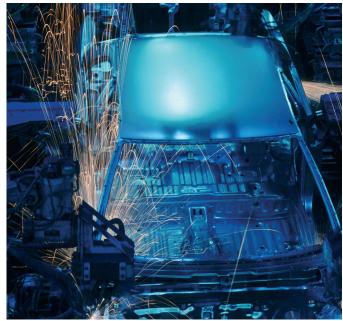

Fig. 2: Typical application: Factory automation

#### **TECHNICAL DATA**

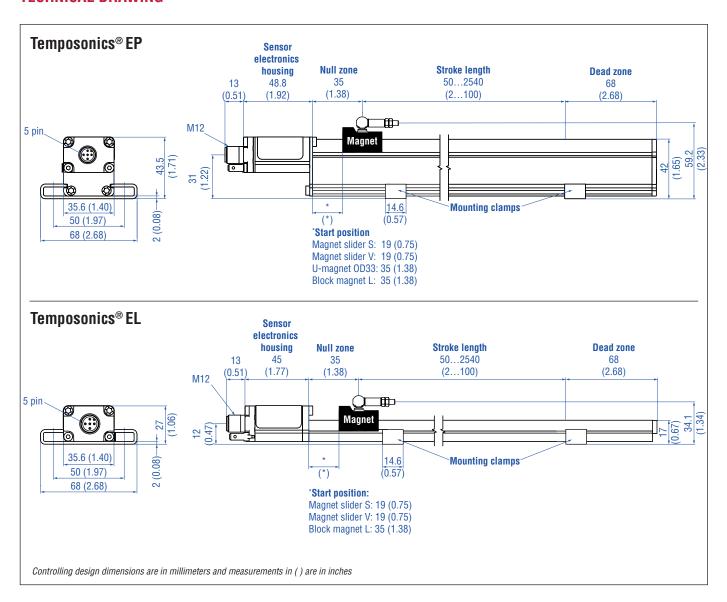

Output	
Interface	CAN System ISO-11898
Data protocol	CANopen: CIA standard DS 301 V3.0 / encoder profile DS 406 V3.1
Baud rate, kBit/s	1000 800 500 250 125
Cable length, m	< 25 < 50 < 100 < 250 < 500
	The sensor will be supplied with ordered baud rate, changeable by customer via LSS
Measured value	Position / option: multi-position measurement (2 positions)
Measurement parameters	
Resolution	10 μm, 20 μm
Cycle time	1 ms
Linearity <sup>1</sup>	Magnet slider: $\leq$ ±0.02 % F.S. (minimum ±60 µm), U-magnet: $\leq$ ±0.02 % F.S. (minimum ±60 µm), block magnet: $\leq$ ±0.03 % (minimum ±90 µm)
Repeatability	$\leq$ ±0.005 % F.S. (minimum ±20 $\mu$ m)
Operating conditions	
Operating temperature	-40+75 °C (-40+167 °F)
Humidity	90 % rel. humidity, no condensation
Ingress protection 2,3	IP67 (if mating connectors are correctly fitted)
Shock test	100 g (single shock) IEC standard 60068-2-27
Vibration test	15 g / 102000 Hz IEC standard 60068-2-6 (resonance frequencies excluded)
EMC test	Electromagnetic emission according to EN 61000-6-3 Electromagnetic immunity according to EN 61000-6-2 The sensor meets the requirements of the EC directives and is marked with <b>C</b> •
Magnet movement velocity	Magnet slider: ≤ 5 m/s; U-magnet: Any; block magnet: Any
Design / Material	
Sensor electronics housing	Aluminum
Sensor profile	Aluminum
Stroke length	502540 mm (2100 in.)
Mechanical mounting	
Mounting position	Any
Mounting instruction	Please consult the technical drawings and the operation manual (document number: <u>551774</u> )
Electrical connection	
Connection type	M12 (5 pin) male connector
Operating voltage	+24 VDC (-15 / +20 %); UL recognition requires an approved power supply with energy limitation (UL 61010-1), or Class 2 rating according to the National Electrical Code (USA) / Canadian Electrical Code.
Ripple	≤ 0.28 V <sub>PP</sub>
Current consumption	4060 mA (depending on stroke length)
Dielectric strength	500 VDC (DC ground to machine ground)
Polarity protection	Up to –30 VDC
Overvoltage protection	Up to 36 VDC

<sup>1/</sup> Magnet slider # 252 182 and # 252 184, U-magnet # 251 416-2 and block magnet # 403 448

 $<sup>{\</sup>bf 2/}\,$  The IP rating is not part of the UL recognition

<sup>3/</sup> The IP rating IP67 is only valid for the sensor electronics housing, as water and dust can get inside the profile

#### FREQUENTLY ORDERED ACCESSORIES – Additional options available in our Accessories Guide [] 551444

#### **Position magnets**

#### Magnet slider S Part no. 252 182

Material: GFK, magnet hard ferrite Weight: Ca. 35 g Operating temperature: -40...+75 °C (-40...+167 °F)

#### Magnet slider V Part no. 252 184

Material: GFK, magnet hard ferrite Weight: Ca. 35 g Operating temperature: -40...+75 °C (-40...+167 °F)

#### U-magnet OD33 Part no. 251 416-2

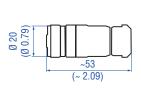

Only for: EP Material: PA ferrite GF20 Weight: Ca. 11 g Operating temperature: -40...+105 °C (-40...+221 °F) Surface pressure: Max. 40 N/mm<sup>2</sup> Fastening torque for M4 screws: 1 Nm

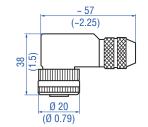

#### Block magnet L Part no. 403 448

**Cord sets** 

Material: Hard ferrite Weight: Ca. 20 g Operating temperature: -40...+75 °C (-40...+167 °F) Fastening torque for M4 screws: 1 Nm

#### Cable connectors 4

### ~ 57 $(\sim 2.25)$

#### M12 (5 pin) female, straight Part no. 370 677

Housing: GD-Zn, Ni / IP67 Termination: Screw; max. 1.5 mm<sup>2</sup> Contact insert: CuZn Operating temperature: -30...+85 °C (-22...+185 °F) Cable Ø: 4...8 mm (0.16...0.31 in.) Fastening torque: 0.6 Nm

#### **DELIVERY**

- Sensor
- 2 mounting clamps up to 1250 mm (50 in.) stroke length
- + 1 mounting clamp for each 500 mm (20 in.) additional stroke length

Accessories have to be ordered separately.

#### NOTICE

Use magnets of the same type for multi-position measurement, e.g. 2 × U-magnets (part no. 251 416-2).
